AADNESEN, LARS. On the behaviour of compression chords for through-bridges. 14(1961)85-100

ABBOTT, M.R. A numerical method for solving the equations of natural convection in a narrow concentric cylindrical annulus with a horizontal axis. 17(1964)471-481

ABUBAKAR, I. Free vibrations of a transversely isotropic plate. 15(1962)129-136

ACKERBERG, R.C. See LEIBOWITZ, M.A. 16(1963)507-519

ACRIVOS, ANDREAS. See GODDARD, J.D. 20(1967)471-497

ADKINS, J.E. A three-dimensional problem for highly elastic materials subject to constraints. 11(1958)88-97

ADLER, J. See ZATURSKA, M.B. 19(1966)485-495

AGGARWALA, B.D. Bending of rhombic plates. 19(1966)79-82

AGRAWAL, H.L. A new exact solution of the equations of viscous motion with axial symmetry. 10(1957)42-44

AITKEN, A.C. Note on the acceleration of Lin's process of iterated penultimate remainder. 8(1955)251-255

AIZERMAN, M.A. and GANTMACHER, F.R. Determination of stability by linear approximation of a periodic solution of a system of differential equations with discontinuous right-hand sides. 11(1958)385-398

ALBASINY, E.L. On the numerical solution of a cylindrical heat-conduction problem. 13(1960)374-384

ALEXANDER, J.M. An approximate analysis of the collapse of thin cylindrical shells under axial loading. 13(1960)10-15

ALEXANDROU, N. and SAFFMAN, P.G. On the final stage of decay of a current blob in a conducting fluid in a uniform magnetic field. 14(1961)437-441

ALFORD, M.J. See SEMPLE, H.M. 23(1970)209-216; 24(1971)115-120

ALLAN, R.R. Satellite orbit perturbations due to radiation pressure and luni-solar forces. 15(1962)283-301

ALLEN, D.N. DE G. The formation of closed wakes in fluid motions. 2(1949)64-71

The calculation of the efficiency of heat regenerators. 5(1952)455-461

A suggested approach to finite-difference representation of differential equations, with an application to determine temperature-distributions near a sliding contact. 15(1962)11-33

Relaxation methods applied to conformal transformations. 15(1962)35-42

ALLEN, D.N. DE G. and DENNIS, S.C.R. The application of relaxation methods to the solution of differential equations in three dimensions.

I. Boundary value potential problems. 4(1951)199-208

II. Potential flow round aerofoils. 6(1953)81-100

III. Three-dimensional stress analysis. 11(1958)172-184

Graded nets in harmonic and biharmonic relaxation. 4(1951)439-443

ALLEN, D.N. DE G. and ROBINS, B. The application of relaxation methods to satisfy normal-gradient boundary conditions associated with three-dimensional partial differential equations. 15(1962)43-51

ALLEN, D.N. DE G. and SEVERN, R.T. The application of relaxation methods to the solution of non-elliptic partial differential equations.
I. The heat-conduction equation. 4(1951)209-222
II. The solidification of liquids. 5(1952)447-454
III. Heat conduction, with change of state, in two space dimensions. 15(1962)53-62

ALLEN, D.N. DE G. and SOUTHWELL, R.V. Relaxation methods applied to determine the motion, in two dimensions, of a viscous fluid past a fixed cylinder. 8(1955)129-145

ALWAY, G.G. Multhopp's influence functions and their automatic computation. 13(1960)112-118

ANDERSON, AEMER D. Singular perturbation solutions of some hot wire conduction problems. 23(1970)163-170

ANDREWS, R.D. and RILEY, N. Unsteady heat transfer from a rotating disk. 22(1969)19-38

AOI, T. See TOMOTIKA, S. 3(1950)140-161; 4(1951)401-406; 6(1953)290-312

APPLEBY, E.J. Interaction of reinforcements in the buckling of plate-web girders. 18(1965)141-160

ARIARATNAM, S.T. The Southwell method for predicting critical loads of elastic structures. 14(1961)137-153

ARMSTRONG, W.D. See HAWTHORNE, W.R. 8(1955)280-292

ARORA, M.K. See WARREN, F.W.G. 20(1967)315-332

ASHOUR, A.A. The induction of electric currents in a uniform circular disk. 3(1950)119-128
The induction of electric currents in a uniformly conducting circular disk by the sudden creation of magnetic poles. 5(1952)379-384
On some formulae for integrals of associated Legendre functions. 17(1964)513-523
Electromagnetic induction in finite thin sheets. 18(1965)73-86

ASHWELL, D.G. The equilibrium equations of the inextensional theory for thin flat plates. 10(1957)169-182
The inextensional twisting of a rectangular plate. 15(1962)91-107
On the deformation of flat plates into cones. 16(1963)163-178
The boundary layer in the bending of inextensible plates and shells. 16(1963)179-191

ATKIN, R.J. Completeness theorems for linearized theories of interacting continua. 21(1968)171-193

ATKIN, R.J. and LESLIE, F.M. Couette flow of nematic liquid crystals. 23(1970)S3-S24

ATSUMI, AKIRA. Stress concentration in a strip under tension and containing an infinite row of semicircular notches. 11(1958)478-490

AXFORD, W.I. The stability of plane current-vortex sheets. 13(1960)314-324
The magnetohydrodynamic Jeffrey-Hamel problem for a weakly conducting fluid. 14(1961)335-351

BABISTER, A.W. Response functions of linear systems with constant coefficients having one degree of freedom. 10(1957)360-368
Determination of the optimum response of linear systems (zero displacement error systems). 10(1957)504-512
Determination of the optimum response of linear systems (zero-velocity-error and zero-acceleration-error systems). 11(1958)119-128

BACKUS, GEORGE E. Application of a non-linear boundary-value problem for Laplace's equation to gravity and geomagnetic intensity surveys. 21(1968)195-221

BAKER, N.H., MOORE, D.W. and SPIEGEL, E.A. Aperiodic behaviour of a non-linear oscillator. 24(1971)391-422

BALDWIN, P. The linear stability of flow in a circular pipe in the presence of a strong transverse magnetic field. 25(1972)333-348

BANDYOPADHYAY, G. and NARASIMHAN, R.K. Special types of group relaxation for simultaneous linear equations. 9(1956)122-128

BANKS, W.H.H. The boundary layer on a rotating sphere. 18(1965)443-454

BARRETT, K.E. An impulsively started stagnation point flow in magnetohydrodynamics. 20(1967)509-516
The impulsive rotation of a dipole-magnetized sphere. 21(1968)389-400

BARTLETT, C.C. The vibration and buckling of a circular plate clamped on part of its boundary and simply supported on the remainder. 16(1963)431-440

BARUA, S.N. A source in a rotating fluid. 8(1955)22-29. Corrigenda. 8(1955)256; 10(1957)512
On secondary flow in stationary curved pipes. 16(1963)61-77

BATCHELOR, G.K. Note on a class of solutions of the Navier-Stokes equations representing steady rotationally-symmetric flow. 4(1951)29-41
The skin friction on infinite cylinders moving parallel to their length. 7(1954)179-192

BATCHELOR, G.K. and PROUDMAN, IAN. The effect of rapid distortion of a fluid in turbulent motion. 7(1954)83-103

BATCHELOR, G.K. and STEWART, R.W. Anisotropy of the spectrum of turbulence at small wave-numbers. 3(1950)1-8

BATCHELOR, G.K. See TAYLOR, G.I. 2(1949)1-29

BAXTER, C.B. and DAVIES, D.R. Heat transfer by laminar flow from a rotating spherical cap at large Prandtl numbers. 13(1960)247-250

BAXTER, C.B. See DAVIES, D.R. 14(1961)223-228

BEAUFOY, LEROY A. and DIWAN, A.F.S. Analysis of continuous structures by the stiffness factors method. 2(1949)263-282
Analysis of pin-jointed redundant plane frameworks using equivalent elastic systems. 3(1950)32-50

BECKETT, P. and POOTS, G. Laminar film condensation in forced flows. 25(1972)125-152

BENDOR, E. Free molecular expansion of initially moving gases into vacuum. 19(1966)497-509

BENNEY, D.J. The flow induced by a disk oscillating about a state of steady rotation. 18(1965)333-345

BENTHEM, J.P. A Laplace transform method for the solution of semi-infinite and finite strip problems in stress analysis. 16(1963)413-429

BERRY, F.J. The diffraction of sound pulses by an oscillating infinitely long strip. 5(1952)324-332
The diffraction of a sound pulse by a non-rigid semi-infinite plane screen. 5(1952)333-343

BEVIR, M.K. Long induced voltage electromagnetic flowmeters and the effect of velocity profile. 24(1971)347-372

BHATNAGAR, P.L. and RATHNA, S.L. Flow of a fluid between two rotating coaxial cones having the same vertex. 16(1963)329-346

BHATNAGAR, P.L. See SACHDEV, P.L. 22(1969)501-512

BICKLEY, W.G. Finite difference formulae for the square lattice. 1(1948)35-42

BINNIE, A.M. The effect of friction on surges in long pipe-lines. 4(1951)330-343
The flow of water under a sluice-gate. 5(1952)395-407
The effect of viscosity upon the critical flow of a liquid through a constriction. 8(1955)394-414
Experiments on the slow swirling flow of a viscous liquid through a tube. 10(1957)276-290

BINNIE, A.M. and HARRIS, D.P. The application of boundary-layer theory to swirling liquid flow through a nozzle. 3(1950)89-106
